Internet Accountability

What we do online impacts our lives offline

More than a decade ago, Covenant Eyes founder Ron DeHaas faced the same questions many people face today.

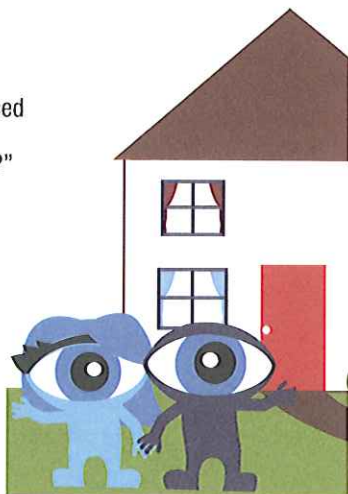

- "How can I teach my children to use the Internet with integrity?"
- "How do I guard my own heart and remain pure online?"
- "How do I serve as an example to my family and church?"

Today, the answer for tens of thousands of Covenant Eyes members is to be open and honest with a friend or mentor about what we do online.

Covenant Eyes Internet Accountability is not a filter: it doesn't block websites. Instead, it monitors all the sites you visit and sends a report to a person that you choose.

In effect, your friend (or parent) is sitting beside you each time you go online, encouraging you to make good choices. Covenant Eyes Accountability, and the relationship it brings, helps change hearts.

See reverse side to better understand how Internet Accountability can work for you.

Internet Filtering

Protecting young minds to develop strong futures.

You already know the basics, like keeping your family's computer in an open area, but that's not enough to protect your children's eyes.

Covenant Eyes can help you fine-tune your approach to better protect your kids online.

Here's how the Covenant Eyes Filter for Windows can help. (*Not available for Mac.*)

- Don't just block mature content, but also set different levels of blocking based on ages or need.
- Create your own list of blocked or allowed websites.
- Decide when and how long every Filter user is online - great for kids.

Download Covenant Eyes to all your home's computers at no additional charge.

Choose Accountability or Filtering, or use both services together.

How does Internet Accountability work?

- 1** Sign up and download the software. Then go online like normal. Covenant Eyes Internet Accountability monitors all Internet use and scores each website visited for mature content.

- 2** We automatically send reports to an Accountability Partner you choose, such as a friend, parent or other trusted person. These reports show how you've used the Web.

Parents: Consider using Internet Accountability for your children or college students to teach responsible Internet use.

- 3** Your Accountability Partners can then talk to you about the report, or you can talk with your kids about theirs. It may be as simple as a quick e-mail or as personal as a conversation.

- 4** Experience freedom! Removing the secrecy helps remove temptation. Uphold your values online and encourage others in your home and office to do the same.
